

# ReSOURCE

## ABOUT

In 1991 in Burlington, Vermont, ReSOURCE (then ReCycle North) began an innovative program of repairing and reselling household items that otherwise would have gone to the landfill. Out of that founding vision, ReSOURCE has expanded its services and programming to offer more opportunities to at risk-youth and low-income Vermonters in need.

In addition to providing goods and services at an affordable price, ReSOURCE has trained over 2,000 individuals through our Job Skills Training programs and given these individuals a chance to learn valuable technical & professional skills and become gainfully employed. For 30 years ReSOURCE's success has proven its sustainability through environmental stewardship, educational training, and economic opportunity in Vermont while being committed to teamwork and collaboration across our programs and departments.
