

ISOVOLTA

ABOUT

Be a member of a fast paced manufacturing team. Isovolta makes electrical insulation for motors and generators. Job openings vary throughout the year; at the moment we are looking to expand our night shift operation. Opportunities exist to learn large machinery and employees will gain an understanding of paper-making processes along with chemical adhesion techniques. Skilled operators exhibiting exceptional work output can sign-up for cross-training considerations too: each job learned increases hourly rates. Our operation is an essential service steadily producing materials even in these uncertain times. The plant is located in Rutland Vermont and has been producing materials since 1955.
