Vermont's Unemployment Rate Down Again

Today, the Vermont Department of Labor released data on the Vermont economy for the time period covering April 2019. According to household data, the seasonally-adjusted statewide unemployment rate for April was 2.2 percent. This reflects a decrease of one-tenth of one percentage point from the revised March rate. The current seasonally-adjusted estimate of the number of unemployed Vermonters (7,565) as well as the statewide seasonally-adjusted unemployment rate are both once again new lows since the U.S. Bureau of Labor Statistics online historical series started in 1976.

Commissioner's Message

"In the past year, Vermont employers report filling a number of jobs with a concentration of activity in three sectors: Durable Manufacturing, Accommodation & Food Services and Health & Social Assistance. Employers in these industries hire a variety of occupations and contribute significantly to the Vermont economy by doing business with customers from in and out of the state. Even with the reported increases in filled jobs, there are still many unfilled jobs not represented in the data. The Department is asking all jobseekers, including recent graduates, to learn about the diversity of employment opportunities currently in the state. By filling open positions, Vermont businesses and the Vermont economy can continue to grow. Please contact one of the regional offices of the Vermont Department of Labor to learn more," said Labor Commissioner Lindsay Kurrle.

State of Vermont Overview

The Vermont seasonally-adjusted unemployment rate declined by one-tenth of one percentage point in April to a level of 2.2 percent. The comparable United States rate in April was 3.6 percent, which was down two-tenths of one percentage point from the revised March estimate. The seasonally-adjusted Vermont data for April show the Vermont civilian labor force increased by 495 from the prior month's revised estimate. The number of employed persons increased by 903 and the number of unemployed persons decreased by 408. The changes to the number of unemployed persons and the unemployment rate were statistically significant in the seasonally-adjusted series.

The April unemployment rates for Vermont's 17 labor market areas ranged from 1.5 percent in Burlington-South Burlington and White River Junction to 4.8 percent in Derby (note: local labor market area unemployment rates are not seasonally-adjusted). For comparison, the April unadjusted unemployment rate for Vermont was 2.2 percent which was a decrease of one-tenth of one percentage point from the revised unadjusted March level and a decrease of seven-tenths of one percentage point from a year ago.

Analysis of Job Changes by Industry

Not-Seasonally-Adjusted

The preliminary 'not-seasonally-adjusted' jobs estimates for April show a decrease of 2,100 jobs when compared to the revised March numbers. There was an increase of 100 jobs between the preliminary and the revised March estimates due to the inclusion of more data. The monthly decrease seen in the April numbers was primarily attributable to seasonal activity related to Leisure & Hospitality. The broader economic trends can be detected by focusing on the over-the-year changes in this data series. As detailed in the preliminary 'not-seasonally-adjusted' April data, Total Private industries have increased by 2,800 jobs (1.1 percent) and Government (including public education) employment has increased by 1,500 jobs (2.6 percent) in the past year.

Seasonally-Adjusted

The seasonally-adjusted data for April reports an increase of 1,500 jobs from the revised March data. As with the 'not-seasonally-adjusted' data, this over-the-month change is from the revised March numbers which experienced an increase of 300 jobs from the preliminary estimates. The seasonally-adjusted over-the-month changes in April varied at the sector level. Those with a notable increase include: Accommodation & Food Service (+500 jobs or +1.5%), Federal Government (+100 jobs or +1.4%), and Professional & Technical Services (+200 jobs or +1.4%). Sectors with a notable decrease include: Mining & Logging (-100 jobs or -12.5%) and Arts, Entertainment & Recreation (-100 jobs or -2.2%).

The Unemployment and Jobs Report for May is scheduled to be released on Friday, June 21, 2019 at 10:00 a.m.
