

## Building Energy

### ABOUT

Building Energy is a locally-owned and operated Vermont company based out of Williston, Vermont. Building Energy started life in 1981 as Northeast Construction, Inc. Northeast Construction was known for its quality carpentry, construction, and customer service. In 2007, Scott Gardner, the founder, decided he wanted to leverage his team's experience and pivot his business to effect a positive change on the environment, thus Building Energy was born. Our teams help businesses and homeowners reduce their carbon footprint and save money by incorporating conservation, efficiency, and renewable energy. Our services include energy audits, insulation and weatherization, solar, cold climate heat pumps, and green construction.
