

Lamoille County Mental Health Services

ABOUT

Lamoille County Mental Health Services (LCMHS) is a community mental health designated agency providing comprehensive mental health, developmental, behavioral, and family support services to the Lamoille Valley. Much of our work happens right in the communities where our consumers live—in their homes, in their schools, in their child care programs, in their jobs. We know that the best path to health and wellness is the one that ensures a full, meaningful life. A steady job, success in school, a solid support system with strong relationships and good friends, good nutrition and healthy exercise.
