

NG Advantage

ABOUT

NG Advantage provides the economic and environmental benefits of clean-burning natural gas to power generators, gas utilities, and large industrial end users that do not have sufficient supply from pipeline natural gas. Using one of the largest “virtual pipeline” fleet of trailers in the US, customers consume the gas directly from the trailers, eliminating the need for on site storage.

Since its inception, NG Advantage has safely and reliably delivered more than 23 Bcf of compressed natural gas throughout the Northeast and has positively impacted the environment by dramatically reducing CO₂ emissions.

EMPLOYMENT OPPORTUNITIES

Operations Technician I

We are currently seeking an Operations Technician 1, based in Milton, Vermont to monitor our Compression Stations in Milton, VT, Springville, PA and Pembroke, NH and customer sites. The Operations Tech I assures the safety of customers and employees and makes sure that the customers receive CNG in a timely and efficient manner. Responsibilities include but are not limited to: reviewing and processing a large amount of data, estimating timely scheduling of trucks and drivers, monitoring on-site and off-site equipment, filling trailers with natural gas and providing the first-line response to emergencies. The Operations Techs work 12-hour shifts, either 6 a.m. – 6 p.m., or 6 p.m. – 6 a.m. for seven days on and then have seven days off. This is a great position for a person who wants quality time with family or who has a flexible side job. It is one of the primary entry points for learning about the gas industry and for advancement.
