

KAMAN

Composite Structures

ABOUT

KCV, an AS9100 Rev D registered company located in Bennington, Vermont, offers a full line of services in composites from design, prototyping and testing, to full production of composite components and assemblies. KCV fabricates components for the defense, aerospace, and imaging markets.

Year after year, Kaman delivers technical breakthroughs and innovative solutions for our customers. We do this by acquiring new technologies, expanding facilities, developing R&D capabilities and investing in our employees. As technology advances and industry shifts, Kaman will always be a place where people can come together and make a difference. Invested in our future together.

We look for employees that are creative, possess drive, enthusiasm and are dedicated team players.
