You are required to make and keep accurate records of your weekly job contacts . A valid contact depends on the type of work you are qualified to perform. Submitting a resume would be a valid contact when applying for work in a "professional" trade. Applying in person would be a valid contact for "non-professional" trades. If the employer requires online applications through their website, a contact is only valid if the application is made in that manner. Telephone calls are NOT an acceptable method of contact. You must contact someone authorized to hire and provide the name and title of the person contacted. You may be asked to submit a copy of this list to the department. Always keep a copy of your list . If you have questions, please refer to "Work Search Requirements" in your claimant handbook or call the claimant assistance line at 877-214-3332.
