

ECI – A Full Service Heavy Civil Contractor:

We bring together a wide variety of experience, engineering knowledge, craft and management skills, and specialty equipment to provide a quality product, on schedule, and at a fair price. Our workforce is focused on safety, quality, integrity, respect, environmental awareness, and good business practice. Our skills include asphalt paving, concrete construction, earthmoving, underground utility construction, railroad construction, deep foundations, directional drilling, auger boring & pipe ramming, drilled anchors, steel fabrication, structure demolition, and more. We thrive on difficult technical projects requiring extensive planning, engineering analysis, and specialized equipment. We work on aggressive schedules and throughout the winter.
