

ABOUT

Janitronics provides facilities services and commercial cleaning to a variety of environments, including but not limited to: office buildings, schools, colleges, medical facilities, industrial plants, shopping centers and private residences. Our primary market is the Northeast, however our systems approach, team cleaning, dedicated training programs, value to our customers and commitment to new technologies allow us to competitively service clients throughout the continental US.

We believe consistent quality service, competitively priced offerings, and training programs tied to strategic service objectives will ensure we realize our goals. We don't just live on the cutting edge of technology — we strive to advance it.

A labor-intensive service company needs strong management. Our managers understand systems, personnel, and customer needs — client by client. One size does not fit all. Janitronics' comprehensive approach results in quick response and the ability to anticipate customer needs. In addition to providing all services to our clients, we provide value.
