

The Physical Plant Department is responsible for the maintenance, repair and upkeep of over 180 buildings and complex facilities on the University of Vermont campus in Burlington, VT. We also operate a 24/7 central utility plant to provide steam heating and chilled water distribution throughout campus, and we maintain over 400 acres of landscape and grounds. We employ a full-time team in a variety of specialties including **HVAC, plumbing, electrical, operating engineers and service technicians**. Our team is pivotal in making the university campus a safe, comfortable, and attractive place for our students to learn and thrive, and for our faculty and researchers to make new discoveries. Become part of the maintenance team that serves a diverse and vibrant campus community! We provide excellent benefits, a team-oriented work environment and an emphasis on safety and new technology.
